# Global Financial Solutions

## Powering the Global Economy

In today's highly competitive global financial market, speed and reliability are the corner stone of sustainable business growth. China Telecom Europe (CTE)'s Ultra Low Latency solution is specifically aimed at business conduction time-sensitive electronic trading between Europe and Asia. Built to services ultra-fast transactions with enhanced reliability, CTE's customers benefit from a stable scalable, low-risk solution and 24x7 support.

## Making Every Second Count

Our network of colocation services in nine key financial markets – including London, Hong Kong, Shanghai and Tokyo – means CTE can offer some of the best low latency connectivity on the market. For example, the Shenzhen-Hong Kong connection has an expected latency just 2ms, outperforming every other provider in the market, while the Shanghai-London connection latency is just 166ms.
